

Ridgeline™

Decorative Wall/Ceiling Fin System

Technical Data sheet

asona

Description.

Ridgeline™ is a NZ made linear timber fin system designed for application over plasterboard wall and ceiling linings without the need for secondary backing boards which means fins can be randomly placed for greater design freedom. The hidden fixing system prevents unsightly screw or nails being visible for a clean finish and the bottom negative detail accommodates for slight variations in wall/ceiling lining flatness to present clean sight lines to the fin/ lining interface. The aluminium mounting system helps keep fins straight and true.

Application.

Ridgeline™ is designed for large high end spaces, reception areas and feature walls. The components are supplied pre-finished and install fast to save on labour costs. Collated into units and assembled on site.

Composition.

Manufactured in NZ from laminated pine and other woods, milled, stained, varnished, or painted combined with an aluminium mounting system.

Benefits.

- Provides an attractive linear aesthetic to plain plasterboard surfaces.
- Can be mounted over wall papered or painted surfaces.
- Concealed fixing system
- Fins can be from laminated timber, laminated FR MDF and finished in a range of stains or paint coatings.

Technical Specifications

Size:

Width and length manufactured to order, consult Asona

Finish:

Available in a wide range of paint, stain, or varnish finishes .

Humidity:

Max 95% R/H at 30°C.
